LETTER FROM PRESIDENT

Dear Colleagues,

Always committed to its constitutional goals and modern scientific perspectives, the **Hellenic Society for Preventive Dentistry (H.S.P.D.)** once again this year focuses on the holistic approach of diseases (prevention and treatment).

Titled "**Current aspects of Cariology**", this year's scientific event is exclusively dedicated to dental caries and will be held on 4, 5 & 6 October 2019 at the Nikopolis Hotel in Thessaloniki.

Aiming at even higher quality standards, this year the event differs from all the previous with regard to the following:

-It includes an even higher number of invited speakers, all of whom are recognized and distinguished worldwide.

-It is addressed to an international audience from Europe and the Middle East, and is not limited only to the local dental community.

- It will be twice as long in duration.

- It will include small group hands-on workshops, as a most popular training process.

-It will attract the active participation of various research teams with poster presentations, the best of which will be awarded (monetary award).

-It will provide participants with better services in even more modern and comfortable venues, along with a more highly professional organization.

For all the above reasons, we are inviting you to participate in our two-day event. We look forward to welcoming you, feeling confident that this event will go far beyond all expectations.

Best regards,

The President

Sotiris Kalfas
